FuelSOME
[Home - FuelSOME](#)

The FuelSOME project focuses on establishing the technological feasibility of a flexible, scalable, and multi-fuel capable energy generation system based on Solid Oxide Fuel Cells (SOFC) technology specially catered for long-distance maritime shipping. In this Industry Workshop insights from the SOFC systems are shared and discussed with participants' inputs, while the Training gives the possibility for a deep-dive into the [Multi-Fuel Pathway Explorer](#) tool for modelling, simulating, and designing multi-fuel pathways.

Please register [here](#) until **7th April 2026**.
